

Gait Analysis

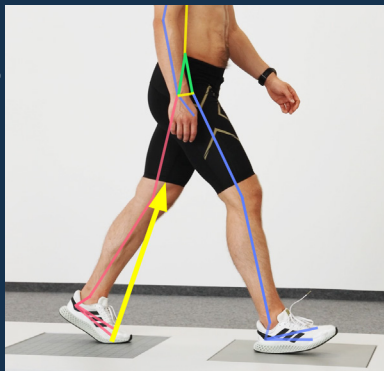

Walk. Analyse. **Improve.**

Turnkey solutions for
markerless motion analysis

Walk

Analyse

Improve

Discover TEMPLO Gait Analysis

- Make human gait cycles visible and measurable
- Get valuable and objective results on individual's biomechanics
- Identify pathological gait patterns, compare analyses and report your findings

Experience smart technology

Application-based

Preset analysis templates and an intuitive user interface empower the analysis as a practical companion for everyday work.

Automated Data Processing

Joint centre detection based on **Markerless Tracking** enables data-based reporting and reduces the analysis effort time to a minimum.

Enjoy the features

Watch short videos about
CONTEMPLAS Gait Analysis in use.

- evidence-based
- streamlined workflow
- utmost flexibility
- meaningful reporting

From basic visualisation up to data-based measurements – your requirements and our expertise create the solution.

Choose. Get started. Extend.
